"Torn is a story about loss, fear, and fear of missing out. I hope I succeeded in conveying these emotions through my music for the game." -- Garry Schyman "I'm a huge fan of classic sci-fi and Neill's music really captures that nostalgic feeling. It flows with the narrative of Torn very well and together, they present a dark, fresh and haunting world. I think it also really helps to create a sense of foreboding and mystery." -- Jonathan Kjellen "This is a story about a man trapped in a world he created, but far from alone. It is a story about a man who has lost his connection with life, and his secrets, and his memories. But there is still hope. And music. And that is why I am in love with 'The Man Behind the Dune'. I'm just too greedy, I just want to try and play everything." -- Jonathan Kjellen "Torn is an absolute must-have for anyone looking for a creative and new VR experience. Neill Glancy's soundtrack is a treat all by itself, and even more so when set to the visuals of a canonical alternate-timeline sci-fi masterpiece, like the parallel world of Torn." -- David Alcorn "Neill Glancy once again delivers a unique artistic vision, deeply revealing the genius of his artistry and the pathos of their human subjects." -- Romanus Peskö Torn PS4, Oculus Home COPYRIGHT(c) 2017 The Creators Project All Rights Reserved. Seven years of war between England and France is transformed into an addictive strategy game. The struggle for the control of North America turns into a clash between two superpowers. The fate of Europe and the wider world are at stake. Empire: Total War is an empire-builder. A real-time strategy game and a

successor of the Empire: Total War series. Another huge World War, another huge game, another huge thing and yet another huge day. Over the last few days, I've been mindlessly playing the new Empire: Total War patch. It's a thing. A massive patch, even, and one which brings with it more than just large scale battles. Oh no, it's got the gorgeous new setting of the North American colonies! I can't say that I did anything other than playing the game for most of the day, but it does feel a bit like Christmas - the real one, of course, as it usually is in the UK. There's a little of that, a little of focusing only on the Empire and the Patch itself, and then a bit of the more usual Christmas blogging that goes on. Empire: Total War has had a long road. Not a terribly long one in the scope of things, but a fairly long one as far as the patch goes. After the rather unsatisfactory pre-Empire: Total War titles, the direct sequel to the much loved Empire: Total War IV, has been a rather significant project. In fact, if you took away the Chinese Civil War and the American Civil War (though that would be a little unfair, since the Chinese Civil War was largely a prelude to the American Civil War and didn't involve a large chunk of the latter), Empire: Total War V, a gazillion miles away from the Empire franchise as we know it today. But of course, this wasn't just the franchise "staying the same" (if you get my meaning) for those four years, with the developer wanting to invest in it. To say the least, they did. And of course, I almost immediately went and bought it, as soon as I heard they were getting around to it. And once I got it, I can't say that I found it terribly hard to buy - I could see the issue from previous patches and the cold, even worse than previous ones, appreciation that kept it from being one of c9d1549cdd
